

# HARSHAD NIMSE

Pune, Maharashtra | +91 9307492275 | [nimseharshad@gmail.com](mailto:nimseharshad@gmail.com)  
**LinkedIn:** [harshad-nimse-941853231](#) | **GitHub:** [github.com/HarshadNimse](#)

Python · MySQL · Data Analytics · ETL Pipelines · n8n · AI Automation · SQL

## SUMMARY

Final-year MCA student with hands-on Python experience (freeCodeCamp certified, ~300 hrs), SQL data modelling, and AI automation pipeline development. Built n8n orchestrator-worker workflows with ETL architecture, Google Sheets data stores, and multi-API integrations. Certified in AI for Management (NPTEL Elite, IIT Madras, 72%) and Data Analytics (Deloitte/Forage). Comfortable designing end-to-end data flows from ingestion through transformation to structured output.

## TECHNICAL SKILLS

**Languages:** Python, SQL, JavaScript, Java (learning), HTML5, CSS3

**Data & Analytics:** Pandas, NumPy, ETL pipeline design, data modelling, JSON/XML parsing, webhook ingestion, data transformation

**Database:** MySQL — schema design, composite indexing, relational modelling, ACID transactions, SQL JOINS, query optimisation

**Automation & AI:** n8n (orchestrator-worker), UiPath RPA, Telegram Bot API, Gmail API, Google Calendar API, Google Sheets API, REST API integration

**Tools:** Git, GitHub, Postman, VS Code, Node.js, Express.js

## PROFESSIONAL EXPERIENCE

### Web Development Intern

Jan 2026 – Apr 2026 (3 months)

CGPI Software Private Limited · Pune

- Contributed to full-stack client projects involving backend API development, frontend implementation, and MySQL database integration.
- Debugged and resolved issues across the codebase; collaborated with the development team on feature delivery and code reviews.
- Worked with structured data through MySQL queries and REST APIs; applied data validation and transformation logic within backend application workflows.

## PROJECTS

### Campus Automation System · n8n · MySQL · Telegram Bot API · Gmail API · Google Calendar API · Google Sheets API

- Built for Dr. D. Y. Patil Institute — faculty-supervised, deployed for college use. Designed an orchestrator-worker ETL pipeline: extract (Telegram webhook) → transform (payload normalisation, SQL JOIN-based RBAC, feature routing) → load (Google Sheets read/write, structured Telegram response).
- Implemented dynamic calendar generation, multi-hall availability aggregation, and stateless session handling via encoded callback\_data — serving concurrent users without server-side session storage.
- Integrated Gmail API for automated notifications and Google Calendar API for conflict detection; Google Sheets OAuth2 as lightweight user registry with role-based access control.

### Real Estate Marketplace | [github.com/HarshadNimse/real-estate-marketplace](#) · Node.js · MySQL · REST APIs · JWT

- Designed MySQL schema with 5+ tables, composite indexes on listing filters (city, type, price, BHK), FK constraints and cascade rules — optimised for multi-filter paginated data queries.
- Built 20+ REST API endpoints; structured data flows from request validation → JWT auth → parameterised MySQL query → JSON response — covering CRUD, filtering, and relational data retrieval.

### Courier Tracking System | [github.com/HarshadNimse/courier-tracking](#) · Node.js · MySQL · Socket.io · Nodemailer

- State-machine MySQL schema (created → in-transit → delivered) with composite indexing on tracking ID and recipient fields; event-driven architecture where status transitions simultaneously trigger Socket.io push and Nodemailer email.
- In-memory rate limiting, API abuse prevention, and unit tests for core query and validation logic.

## EDUCATION

### MCA (Master of Computer Applications)

2024 – 2026 Dr. D. Y. Patil Institute of Management and Research, Pune | CGPA: 7.44

### B.Sc. Computer Science

2021 – 2024 Abasaheb Garware College, Pune · SPPU | 75.2%

## CERTIFICATIONS

- NPTEL Elite — Artificial Intelligence (AI) for Management, IIT Madras | Score: 72% | Jan–Apr 2026
- Python Developer Certification — freeCodeCamp | ~300 hours | Jun 2026
- Data Analytics Job Simulation — Deloitte / Forage | Jun 2025
- Complete UiPath RPA Developer: Build 7 Robots — Udemy | 30.5 hrs | Nov 2023
- Database by Stanford Dbclass — Cursa | 17h 42m | Dec 2024
- JavaScript — Infosys Springboard | Apr 2025
- Python Bootcamp — Infosys Springboard | Nov 2024
- Software Engineering — Infosys Springboard | Nov 2024
