Java · Spring Boot · Full Stack Developer · Node.js · React · MySQL · REST APIs · Automation

SUMMARY

Final-year MCA student with a 3-month industry internship and four full-stack projects built independently. Primary career target is Java Spring Boot backend development; currently skilled in Node.js, Express, MySQL, and REST API design. Built AI-driven automation systems and real-time web applications. Strong foundation in object-oriented design, database architecture, and agile delivery.

TECHNICAL SKILLS

Java / Spring Boot: Java (Spring Boot — primary target), Maven, OOP, REST API design, MVC architecture

Full Stack: Node.js, Express.js, React.js, Bootstrap, Vite, TypeScript, HTML5, CSS3

Database: MySQL — schema design, composite indexing, FK constraints, ACID transactions, SQL JOINS

Automation: n8n (orchestrator-worker pipelines), Telegram Bot API, Gmail API, Google Calendar API, UiPath RPA

Tools: Git, GitHub, Postman, VS Code, Google Sheets API, Python (learning)

PROFESSIONAL EXPERIENCE

Web Development Intern

Jan 2026 – Apr 2026 (3 months)

CGPI Software Private Limited · Pune

- Contributed to full-stack client projects involving backend API development, frontend implementation, and MySQL database integration.
- Debugged and resolved issues across the codebase; collaborated with the development team on feature delivery and code reviews.
- Applied REST API design principles and worked across the stack — backend logic, database queries, and frontend integration for client-facing web applications.

PROJECTS

Real Estate Marketplace | github.com/HarshadNimse/real-estate-marketplace · Node.js · Express · MySQL · JWT · React

- Built a full-stack property platform with buyer, seller, and admin roles; JWT authentication, role-based access control middleware, and an admin approval queue for property listings.
- Designed MySQL schema with 5+ tables, composite indexes on listing filters, FK constraints, and cascade rules; 20+ REST API endpoints covering CRUD, image uploads, and buyer-seller inquiry flows.

Courier Tracking System | github.com/HarshadNimse/courier-tracking · Node.js · Express · MySQL · Socket.io · Nodemailer

- Built a real-time shipment tracking app with Socket.io status push updates (zero polling), Nodemailer email alerts on status transitions, and token-based admin authentication.
- State-machine MySQL schema (created → in-transit → delivered), in-memory rate limiting middleware, and unit tests for core API logic.

Campus Automation System · n8n · Telegram Bot API · Gmail API · Google Calendar API · Google Sheets API · MySQL

- Built for Dr. D. Y. Patil Institute — faculty-supervised, deployed for college use. Designed orchestrator-worker n8n pipeline: webhook ingestion → payload normalisation → SQL JOIN-based RBAC → feature routing → dynamic Telegram inline keyboard UI.
- Integrated Gmail API for automated email notifications and Google Calendar API for booking conflict detection; Google Sheets OAuth2 as user registry with session state encoded in callback_data for stateless multi-user handling.

Freelancing Platform | github.com/HarshadNimse/freelancing-platform · JavaScript · TypeScript · Vite · React · Bootstrap · Node.js · MySQL

- Developed a client-freelancer marketplace with dual-role access, job posting, bidding, and contract management modules; Vite + Bootstrap frontend with structured Node.js/MySQL backend.

EDUCATION

MCA (Master of Computer Applications)

2024 – 2026 Dr. D. Y. Patil Institute of Management and Research, Pune | CGPA: 7.44

B.Sc. Computer Science

2021 – 2024 Abasaheb Garware College, Pune · SPPU | 75.2%

CERTIFICATIONS

- NPTEL Elite — Artificial Intelligence (AI) for Management, IIT Madras | Score: 72% | Jan–Apr 2026
- Python Developer Certification — freeCodeCamp | ~300 hours | Jun 2026
- Data Analytics Job Simulation — Deloitte / Forage | Jun 2025
- Complete UiPath RPA Developer: Build 7 Robots — Udemy | 30.5 hrs | Nov 2023
- Database by Stanford Dbclass — Cursa | 17h 42m | Dec 2024
- JavaScript — Infosys Springboard | Apr 2025
- Python Bootcamp — Infosys Springboard | Nov 2024
- Software Engineering — Infosys Springboard | Nov 2024
